Our philosophy

We excel in crafting, producing, consulting on, and distributing luminaires, with a keen focus on architectural lighting that ignites our passion. At the heart of our mission is the transformation of our clients' dreams and visions into bespoke projects that captivate and inspire. Our meticulously crafted lighting systems not only set the ambiance but also profoundly influence perception, ensuring everyone feels both comfortable and secure. Our products stand out for their contemporary design, superior quality, and unmatched functionality. Our track record speaks volumes, with prestigious collaborations with leading hotel chains underscoring our expertise. From illuminating shopping centers to enchanting concert halls, from cinematic experiences to productive office spaces, from public installations to private sanctuaries, we've conceptualized and executed thousands of lighting solutions across diverse environments.

Gorget

Karim Rashid

Karim Rashid is one of the most prolific designers of his generation. Over 4000 designs in production, over 400 awards, and operating in over 35 countries attest to Karim's legend of design. His award-winning designs include democratic objects like the ubiquitous Garbo waste can and Oh! Chair for Umbra and interiors like the Morimoto restaurant, Philadelphia and Nhow hotel, Berlin. Karim has created noteworthy designs for clients Method and Pepsi, furniture for Artemide and Vondom, brand identity for Citibank and Hyundai, high-tech products for LaCie and Samsung, and luxury goods for Veuve Clicquot and Christofle, to name a few.

Gorget

Shining star

The Gorget, designed by Karim Rashid, is inspired by the French word „gorge,” which refers to the throat and recalls a band of linen worn around a woman’s neck and head during the medieval era. Its sleek, futuristic design is rooted in modular elements that come together to form our collection. Comprising interlocking rings (constellation) that can be woven into captivating hanging sculptures, a linear system ideal for accentuating corridors and hallways, and sconces to adorn walls wherever they are desired, the Gorget embodies versatility and aesthetic refinement.

GOOD
DESIGN

Variants: line, constellation
Installations: suspended, wall
Diffusers: satin

The collection comprises an array of pre-made lamps, available in diverse shapes and colors. With its extensive range of options, it offers an ideal toolkit for crafting spaces in offices, residences, or commercial buildings. Additionally, we offer comprehensive technical assistance to tailor the system to the specifications of your contracted project, ensuring seamless integration and satisfaction.

Gorget Line

A range of possibilities

The Gorget line takes the concept of a linear system to the next level. Its irregular, unique shape will work perfectly in corridors and hallways, where it will guide the recipient to their destination with light. Light can be emitted both upwards and downwards, providing both a decorative effect on the wall and functional floor lighting.

Gorget Constellation

Rings

The Gorget collection also includes three sets that close in the shape of a ring. Thanks to their design, they can be interwoven to create unique hanging works of art. The “Constellation” version is perfect for large open spaces, where you can hang several rings, as well as over a conference table, where several interweaving lamps will illuminate the space for shared meetings. The lamp can also hang on its own over a round table and serve as a chandelier.

Gorget Wall

Reflected light

The collection is complemented by a wall sconce. The sconce features a mounting box made of brushed aluminum, adding character and elevating it to the highest standards. The lamp casts a warm, expansive glow onto the wall, enhanced by our original colors, sure to capture attention. The Gorget wall sconce is available in two sizes and consumes half the power of the suspended versions.

For the Gorget fixture, a specially designed box is dedicated, available in black or white colour.

The Constellation variant can be interwoven effortlessly, thanks to its original structure that can be easily opened. This solution enables you to craft captivating sculptural combinations.

The Gorget family elevates lighting design to the next level by incorporating sculptural forms into fixtures such as scones, linear systems, or suspended constellations. Designed by Karim Rashid and honored with the Good Design Award by the Chicago Museum of Architecture and Design.

Gorget Set Line 1
direct/indirect

Mounting:	suspended
Dimensions:	1692 x 642 x 24 mm

Kone

Kone

Design excellence

The Kone collection embodies the geometric essence of its name, manifesting in sleek designs crafted from glass and metal. The Kone collection offers two distinct variations, each characterized by unique shapes and lighting sources.

Kone showcases a combination of lenses and light rings, delivering both focused spotlighting and a subtle, upward and downward glow.

On the other hand, Double Kone boasts LEDs encased in glass, emitting a soothing ambient light. With its diverse range of fixtures, the Kone collection empowers you to effortlessly integrate lighting solutions into a myriad of spaces and applications.

Variants:	Kone, Double Kone
Installations:	ceiling built-on, suspended, wall, table
Diffusers:	PVD glass, lens

Kone wall

Subtle Accents

The Kone Wall series presents a versatile choice with two distinct options, catering to varying lighting needs: ambient or spotlight. This flexibility allows you to utilize the fixture for either broad, general illumination across all directions or to create focal points and subtle decorative accents with spotlighting. Ideal for living rooms, open spaces, and narrow corridors, both in residential and commercial settings, these wall sconces offer practical yet stylish lighting solutions.

Timeless materials were combined with great colors and finishes. Our extensive color palette of powder-coated metals ensures a perfect match for any aesthetic, while our glass undergoes a sophisticated physical vapor deposition process to achieve its rich, enduring coloration. It's a mix of the past and future, a combination of high technology and traditional craftsmanship.

Combining two types of lighting in one collection enables you to shape space with precision, infusing each area with its own distinctive ambiance. Whether through soft ambient light or focused spotlights with delicate hues in colours like amber, warm white or blue. Our collection empowers you to craft the perfect atmosphere for every occasion.

Kone Set

Design multiplied

Kone Set have been integrated into a set version, offering multiple shades that can be combined to create diverse arrangements suitable for large spaces.

Kone table

Delicacy of form

The Kone table elevates your space with its distinctive flair and atmosphere. Crafted from quality materials and featuring an original design, it serves not only as a functional piece but also as a beautiful decorative object. Its fusion of simplicity and character ensures it remains a timeless addition to your décor.

Kone C

Mounting:	surface

Snake

Shape your lighting

The Snake system consist of thirty shapes available in sixteen colors and three mounting options.

Snake

Adaptable light sources

The Snake system offers customizable adjustments to suit your lighting preferences and spatial needs. Choose from four different diffusers, utilize either line light or LFO by Bartenbach technology, or opt for a covering module with no light emission.

Snake

Modular versatility

We have developed a diverse array of connecting modules that, when combined with the traditional line solution, enable the creation of unique lighting arrangements perfectly tailored to your space, requirements, and functionality. Our modules are also available in complementary light technologies and colors, allowing for the illusion of an endless light source that envelops the entire space.

In CHILI technology, the light comes out of the luminaire through 9 mm hole. The luminaire comes in two versions of the beam angle: 30° and 60°

Connection of profiles in a way that eliminates the risk of glowing through the gaps.

With it you can freely adjust the height of the luminaire suspension with an accuracy of 1 mm. It is possible to change the position of the micropositioner.

Our high-quality components boast easy assembly, thanks to the internal use of magnets. With meticulous attention to detail,

these modules are manufactured in-house at our factory in Poland, ensuring they meet our stringent quality standards.

Snake

Easy creation

Our range of options is user-friendly, accessible through our light planner tool or even through the traditional pen-and-paper method. Arrange it as needed to craft mesmerizing lighting effects that seamlessly integrate with the architecture or create striking sculptural compositions that command attention.

Light planner

Design tool

Light Planner converts even the most complex projects into easy graphic language. Build configurations by dragging prepared elements from the library. Choose the length, complement it with selected modules, determine the colors, set the amount of light or distribution angles.

Curved profiles

Special LFO optics provide comfortable and soft light with very good glare limitation factors. Eleven sizes (from 60 cm to 6 meters in diameter) available in different colors and a several curves of the circle, connect them together and create something one of a kind.

Variants: line, chili
Installations: ceiling built-on, suspended,
Diffusers: satin, microcrystal, dark microcrystal,
microprismatic, chili spots.

Loop

LFO technology by Bartenbach

Developed by scientists at the Bartenbach laboratory in Austria, with the participation of which Organic Lighting has created a line of modern lighting fixtures - CHILI. Its greatest strength lies in what you can not see, because the light is emitted in a way that is invisible to the eye. In this innovative optics design, light is concentrated in a maximally small space, and then invisibly disperses in the room.

In CHILI technology, the light comes out of the luminaire through 9 mm hole. The luminaire comes in two versions of the beam angle: 30° and 60°

Connection of profiles in a way that eliminates the risk of glowing through the gaps.

With it you can freely adjust the height of the luminaire suspension with an accuracy of 1 mm. It is possible to change the position of the micropositioner.

Snake acoustic

Acoustic comfort

Snake Acoustic is an innovative extension of the Snake system that enhances its functionality by incorporating acoustic panels made of lightweight, eco-friendly EcoBoard material. These panels are not only resistant to mechanical damage but also exhibit a high sound absorption coefficient. As a result, Snake Acoustic performs exceptionally well in open spaces and offices, creating a pleasant and ergonomic work environment.

Variants: line
Installations: suspended
Diffusers: satin, microcrystal, dark microcrystal
microprism

Various shapes and sizes of Snake Acoustics have been designed to accommodate a wide range of spaces. Utilize them freely to enhance acoustic comfort in hallways, dining rooms, and other open areas.

Snake acoustic

Ready made sollutions

We've ensured that our acoustic lamps seamlessly integrate into interiors. Our diverse range of lamps is designed to complement any space effortlessly. Building upon the excellence, we've incorporated various light diffusers and cutting-edge technology for easy assembly, enhancing them with premium acoustic eco-materials. We also made sure its easy to use, chose the ready made sollution from our catalogue or webside and forget about using online tools or combining modules on paper.

We've utilized 35 cm PET felt panels to ensure that your space meets acoustic standards. These panels are crafted from fibers derived from recycled plastic bottles, making them an eco-conscious choice. The material is not only environmentally friendly but also safe for human health. It boasts odor resistance, resilience against mold, damage, and deformation, while also being free from harmful substance emissions.

Our acoustic lamps are easily adaptable to your needs and preferences. Choose from a variety of diffusers, light sources, and PET felt colors to bring your vision to life.

Rink

Rink

Minimalist design

The Rink series of luminaires convinces with its minimalist design, modern LED technology and and exceptionally easy installation. The body is magnetic connected to the base. The variety of combinations will be framed for the possibility of use in almost any place. The wide selection is enriched by three diffusers, many sizes and colors and four mounting options.

Variants: round , square
Installations: ceiling built-on, suspended, built-in
Diffusers: satin, microcrystal, dark microcrystal

The unique light effect possible to obtain thanks to the use of three types of diffuser. Innovative mounting available in four variants, allows the use of ceilings in general-purpose rooms such as offices, hotels, schools, etc.

A rod with the possibility of adjusting the angle of the luminaire from 0 to 45 degrees, in one plane.

A clever, easy-to-use system of strong magnets to connect the ceiling box to the luminaire.

Rink Round C
direct, direct/indirect

Mounting:	ceiling built-on
Diameter:	Ø 345 / Ø 430 / Ø 560 / Ø 830 / Ø 1100 mm
Power:	7.9 - 173 W
Luminous flux* (direct)	676 - 17909 lm
Luminous flux* (indirect)	22 - 5563 lm
Diffuser:	satine, microcrystal, dark microcrystal
UGR:	<19 (dark microcrystal)
Control :	ON-OFF or DALI

Rink Round F
direct

Mounting:	built-in
Diameter:	Ø 361 / Ø 446 / Ø 576 / Ø 846 / Ø 1126 mm
Power:	7.9 - 173 W
Luminous flux* (direct)	676 - 17909 lm
Diffuser:	satine, microcrystal, dark microcrystal
UGR:	<19 (dark microcrystal)
Control :	ON-OFF or DALI
Cut out:	Ø - 10 mm Hmin = 130 mm

Rink Round S
direct, direct/indirect

Mounting:	suspended
Diameter:	Ø 345 / Ø 430 / Ø 560 / Ø 830 / Ø 1100 mm
Power:	7.9 - 173 W
Luminous flux* (direct)	676 - 17909 lm
Luminous flux* (indirect)	22 - 5563 lm
Diffuser:	satine, microcrystal, dark microcrystal
UGR:	<19 (dark microcrystal)
Control :	ON-OFF or DALI

Rink Round P
direct, direct/indirect

Mounting:	suspended
Diameter:	Ø 345 / Ø 430 / Ø 560 / Ø 830 / Ø 1100 mm
Power:	7.9 - 173 W
Luminous flux* (direct)	676 - 17909 lm
Luminous flux* (indirect)	22 - 5563 lm
Diffuser:	satine, microcrystal, dark microcrystal
UGR:	<19 (dark microcrystal)
Control :	ON-OFF or DALI

Features

Light source:	CRI> 80, MacAdam ≤ 3, 50.000h L80B10
Luminaire power:	high efficiency (HE), high output (HO)
Color temperature (CCT)	3000K, 4000K
Control :	ON-OFF or DALI
Driver:	integrated
IP protection:	IP20

Rink Square C
direct, direct/indirect

Mounting:	ceiling built-on
Diameter:	300x300 / 430x430 / 560x560 / 830x830 / 1100x1100 mm
Power:	8.4 - 174 W
Luminous flux* (direct)	720 - 18057 lm
Luminous flux* (indirect)	23 - 5563 lm
Diffuser:	satine, microcrystal, dark microcrystal
UGR:	<19 (dark microcrystal)
Control :	ON-OFF or DALI

Rink Square F
direct

Mounting:	built-in
Diameter:	316x316 / 446x446 / 576x576 / 846x846 / 1126x1126 mm

Multicone Square Panel
Wall

Multicone

Unlimited possibilities of exposure

Four types of mounting Multicone luminaires will help to implement the most sophisticated arrangement of every room.

Multicone

Structured performance

The basic geometric shape represents purity and rationality, while the combination of opposing forms gives the room character. Thanks to innovative functions, the level of efficiency has been optimised

Multicone

Regularity above all

The basic form based on squares and rectangles imposes architectural architectural character. Top-quality materials, energy-saving technology and a variety of finishes make Multicone Square / Rectangular the ideal lighting solution for public and business zones. A separate color has been introduced for personalization housing and front.

The luminaire was made in the innovative Multicone technology consisting in the retraction of the lens with the LED source in the mechanically formed front. Thanks to this treatment the effect of natural, eye-healthy light is achieved.

Thanks to the low UGR index (beam angle 60° - $UGR < 19$), the glare effect is reduced and exclusive lighting quality and absolute visual comfort are achieved.

Multicone Panel suitable for large and small spaces where a stronger lighting accent of a larger size works. Lenses with a 60° light distribution provide uniform general illumination that is efficient.

Multicone

Let your office take on character!

The severity of the luminaire with right angles and natural light gives an aesthetic accent. The round lenses are arranged symmetrically into intersecting rows. Interesting space requires both structure and delicacy.

Elite

Elite

A light you can't see. Is it possible?

The unique LFO optics combined with the highly polished Elite louver create a minimalist lighting effect. The UGR<19 guarantees the effect of stage lighting emitted from the hide.

Light source: LFO Bartenbach
Installations: ceiling built-on, suspended, built-in
Optic: lens 30°, 60°

Elite

Four installation variants

Thanks to the various mounting options, Elite luminaires blend in any interior design, giving it a theatrical character.

The LFO technology, developed by scientists from the Bartenbach laboratory in Austria emits light through 9 millimeter hole invisibly to the eye. The combination of this phenomenon with the highly polished Elite louver designed by the ILUM team ensures that the viewer cannot see where the light is coming from and the emitted light is user-friendly. The final effect provides a unique comfort of staying in such illuminated room

Thanks to the low UGR index (beam angle 30°, 60° - UGR < 19), the glare effect is reduced and exclusive lighting quality and absolute visual comfort are achieved.

Elite C

Mounting:	ceiling built-on
Dimensions:	39 / 71 / 103 / 167 / 263 / 327 / 391 mm
Number of spots:	1 / 2 / 3 / 5 / 8 / 10 / 12
Power:	2.2 - 26.9 W
Luminous flux* (direct)	195 - 2340 lm
Optic / beam angle	BB LFO 30°, 60° with anit-glare black louver
UGR:	<19
Control :	ON-OFF or DALI

For Elite 1, 2, 3, 5 driver not included, must be ordered separately.
Driver cover recommended for ELITE 1, 2, 3 and 5 (service revision).

Elite S

Mounting:	suspended
Dimensions:	39 / 71 / 103 / 167 / 263 / 327 / 391 mm
Number of spots:	1 / 2 / 3 / 5 / 8 / 10 / 12
Power:	2.2 - 26.9 W
Luminous flux* (direct)	195 - 2340 lm
Optic / beam angle	BB LFO 30°, 60° with anit-glare black louver
UGR:	<19
Control :	ON-OFF or DALI

For Elite 1, 2, 3, 5 driver not included, must be ordered separately.
Driver cover recommended for ELITE 1, 2, 3 and 5 (service revision).

Features

Light source:	CRI> 80, MacAdam ≤ 3, 50.000h L80B10

Torro

Torro

Even consistency

Its aim is to provide a comfortable work with the modularity of the available solutions, slim design and $UGR < 19$. In addition to the standard luminaire configurations, it is possible to compose a dedicated solution according to customer requirements.

Light source: Anti-glare black louver
Installations: ceiling built-on, suspended
Optic: Lens 60°

Torro
Ceiling

Torro
Suspended

Torro
Suspended

Torro

Two installation variants

The unique suspension system provides extensive possibilities for arranging the suspension of the luminaire to the ceiling.

In Torro, we've harmoniously merged sleek minimalist design with optimal light distribution. Our product offers the flexibility to select between direct and indirect light distribution, allowing you to customize your lighting experience according to your preferences and needs.

With our cutting-edge technology and high-performance optics, we achieve an impressive luminous efficacy of up to 145 lm/W. This exceptional efficiency ensures not only superior brightness but also significant energy savings, making our lighting solution both environmentally friendly and cost-effective. Experience unparalleled illumination that maximizes both performance and efficiency, setting new standards in lighting excellence.

The entire fixture is based on magnets, making it easy for repair, installation, and servicing. High-quality components ensure that it will accompany us for many years of use.

Torro C

Mounting:	ceiling built-on
Dimensions:	565 / 844 / 1144 / 1403 / 2240 mm
Number of spots:	14 / 21 / 28 / 35
